

Front Layer Styles

Single Tied

Double Tied

Criss-Crossed

Basket Weave

Lattice Weave

Some ties are not available for some fabrics due to the thickness of the fabric

Basket Weave can only be used on 10'W front layers. When choosing a basket weave front layer, you will need to choose a drape that is taller than the drape on your back layer so there is enough excess drape to be held down with weights.

Lattice Weave can only be used on 10'W front layers and is only available for drape that is 12' or taller.
