GENERATOR GROUNDING WAIVER – CUSTOMER INSTALL

GENERAL INFORMATION:

Thank you for choosing Canton Chair Rental to provide a generator for your upcoming event. Canton Chair Rental is committed to the safety of our customers, your property and your guests.

In order for generators to function safely, they must be properly grounded with a copper rod inserted 6' to 8' into the ground. With the increase in utilities being buried underground, the risk for personal injury and property damage becomes a concern with generator installations. Ohio Law (3718.25-32 of the Ohio Revised Code) requires that anyone penetrating the surface of the earth must have the utilities marked on their property before they "dig." Canton Chair Rental is providing you with the information you need to abide by this law.

You must call the Ohio Utilities Protection Service (OUPS) to make arrangements for the marking of all public underground utility lines before installing the generator.

This service is **free**.

In order to properly mark utilities, paint markings or flags may be placed on your property. **Do not** mow over, move or remove any utility paint or marking flags until after you have installed the generator.

HAVE PUBLIC UTILITIES MARKED:

Please contact the Ohio Utilities Protection Service (OUPS) at **811** or **1-800-362-2764**, at least 48 hours but no more than 10 working days (excluding weekends and legal holidays) before installing the generator. You will need the following information before calling:

- County and township or city where the generator will be installed
- Date of generator installation
- Where on your property the generator will be installed
- Equipment used to install generator (normally stakes and sledge hammer)
- Nearest intersecting streets to your address
- Farthest distance from the street in front of your house to where the generator will be installed

Please be aware that someone will be on the property to mark the utilities and that any pets should be restrained and fenced areas will need to be made available.

4850 Southway St. S.W.

MARKING PRIVATE UTILITIES:

Remember that there may be private utilities buried on your property also. OUPS **DOES NOT** mark private utilities. You, the customer, are responsible for making sure any privately installed utilities are not struck. *These include, but not limited to, sprinkler systems, electrical lighting wires, gas lines (i.e. propane), artesian wells, underground structures, septic systems, down spouts, leech beds, phone lines, cable lines, pool equipment, invisible fencing, etc.*

GENERATOR INSTALLATION:

Do not insert copper rod to ground the generator within 18 inches on either side of any utility markings.

Your signature accepting your responsibilities outlined above is required below before we can rent the generator to you. We will be happy to answer any questions you may have.

I have been informed of my responsibility to contact the Ohio Utilities Protection Service to mark all public utilities and gas and oil wells and transmission lines and that I must mark all private underground utilities before installing the generator. I understand and accept the responsibility for any above or below ground damage and/or injuries that may occur during installation.
