

Linens Sizing for 1/2 Round Table

A 72x72 table cover will drop to the floor in the back.

A 72x72 table cover will not cover to the floor in the front.

Use a 120" round linen folded not quite in half and hold it in place with clips.
The 120" round will not cover the back of the table.

To cover the back use a 72x72 under the 120" round as shown above.

Other variations:

A 120" round table linen folded almost in half and clipped onto the table. Placing a 72x72 on top of it would cover the back and front of the table to the floor.

This look is shown in the example below.

Clipping a 120" and a 90" round table linen folded in half onto the table.

This will leave the back open. This look is shown in the example below.
