TO BEGIN OPERATION:

1. Fill the coffee urn with hot coffee. Place the lid on top of the urn.
2. Pry the lid from the canned sterno fuel, and place it into the metal sterno cup. Insert the cup into the holder below the urn.
3. Light the fuel. Adjust the metal sterno cup lid to be 1/2 open and place it on top of the cup. Low flame is sufficient for proper heat. The 1/2 covered fuel will burn for over an hour.

WHEN FINISHED:

1. Extinguish flame by adjusting the metal sterno cup lid to cover the fuel. Let the urn cool until it is safe to touch.
2. Remove any remaining coffee from the urn. Rinse out the coffee urn. DO NOT use harsh abrasives.
3. Throw away the used sterno fuel cans. DO NOT throw away the metal chafer cup and lid.
4. **Please place ALL parts in the wooden storage box and return to Canton Chair Rental to avoid additional charges!**

WARNING:

- **Keep sterno fuel AWAY from open flames or hot stoves.**
- To protect your table linens or serving surface, consider using an underliner tray with the urn.
- The urn becomes very hot during operation. Do not touch the urn without hot pads or oven mitts.
